

Yannick Duport becomes Sales and Marketing Director of the Dalkia Group

On 1 January 2021, Yannick Duport was appointed Sales and Marketing Director of Dalkia (EDF Group). He replaces François Vasse and joins the company's Executive Committee.

Yannick Duport, an engineering physics graduate of INSA, joined EDF in 1994 where he had a wide range of operational responsibilities in the Distribution Division.

At the end of 2003, he joined the Insular Energy Systems Division, which covers all the activities of the energy chain, where he became Director of Customer and Commercial Services for EDF Réunion.

In 2007, he was appointed Director of the Haute Corse branch in Bastia and then joined the EDF Group's Audit Department in September 2010.

From 2012 to 2015, Yannick Duport was responsible for coordinating the Customers, Services and Regional Action Division under the Executive Director of the EDF Group, where he was also in charge of the Commercial Communications Department.

In March 2016, Yannick Duport took up the position of EDF Commercial Director Île-de-France. He became Director of Electric Mobility for the EDF Group in October 2019, when the energy company launched its Electric Mobility Plan. As such, he developed multiple offers with subsidiaries and strategic partners, in order to position EDF as the leading energy company in electric mobility in its four major European markets (France, United Kingdom, Italy and Belgium).

Yannick Duport is now delighted to be joining the Dalkia Group: *"I am very proud and honoured to join the Dalkia teams. The group is a key player in energy transition in the regions, putting the customer at the heart of its action, with innovative and highly effective energy solutions. Its approach is in keeping with my own convictions as regards promoting the climate in order to build an energy future that reconciles preservation of the planet with low-carbon growth"*.

Dalkia: working with you to step up your sustainable energy performance.

Dalkia, a subsidiary of the EDF Group, supports its customers in their energy and digital transformations through its two business lines: the development of local renewable energies and energy savings. Dalkia offers its customers tailored solutions for each building, each city, each local authority, each region and each industrial site to help them rise to the challenge of the energy transition and make them smarter.
