

## PRESS RELEASE

3 December 2020

# Dalkia strengthens its expertise in electrical engineering with the acquisition of KSB Service EITB Sitelec

**On 2 December 2020, Dalkia acquired the shares of the French company KSB Service EITB Sitelec, based in Montfavet (Avignon). By joining the group, the company takes the name Dalkia EITB, EDF Group.**

KSB Service EITB Sitelec is a company specialising in the maintenance and renovation of electrical equipment (high-voltage substations and transformers, alternators and rotating machines). Operating at sites throughout France, it has had a varied portfolio of industrial customers for more than seventy years, employs around fifty people and has a turnover of around ten million Euros. The company is now one of the major players in transformer maintenance, capitalising on a recent workshop that enables it to work on the most demanding operations.

The acquisition of KSB Service EITB Sitelec strengthens Dalkia's know-how in electrical engineering. It will enable the group to continue to develop its activities in the field of high-voltage power dedicated to delivering energy performance to its customers, particularly in the industrial sector.

Sylvie Jéhanno, Dalkia Chairwoman & Chief Executive Officer, said: *"I would like to welcome the KSB Service EITB Sitelec teams to the Dalkia Group. Their advanced skills in electrical engineering complement those of Dalkia and will enable us to expand the services we offer to our industrial customers. Electricity is a key part of energy transition and this acquisition further strengthens our commitment to supporting our customers in reducing their carbon emissions."*

Gilbert Marcelli, Director of KSB Service EITB Sitelec, added: *"It is with great pride that we join Dalkia. This is the beginning of a new era for us. The professionalism, expertise and responsiveness of the men and women in our company have been recognised. I'm sure they will be able to live up to the trust that Dalkia has placed in us and play a full part in the development of high-voltage activities."*

### **Dalkia: working with you to step up your sustainable energy performance.**

Dalkia, a subsidiary of the EDF Group, supports its customers in their energy and digital transformations through its two business lines: the development of local renewable energies and energy savings. Dalkia offers its customers tailored solutions for each building, each city, each local authority, each region and each industrial site to help them rise to the challenge of the energy transition and make them smarter.
