The values of the Group

Our ambition

Within a context of energy transition, the ambition of EDF group is to be a champion of low-carbon growth, committed to meeting the new expectations of customers, as well as all stakeholders, by offering them value-added goods and services.

Sharing our ethical values and respecting the laws and regulations that apply to us are at the heart of our commitment and reflect our corporate responsibility.

The values of the Group

The Group Ethics Charter has been evolving since 2013, within the integrity requirement to support performance, around the three values embodied in our activities:

Respect

Solidarity

Responsibility

These values are central to our identity and are a symbol of our pride. They reinforce our commitment to ensure a relationship of trust with all our stakeholders. They guarantee the cohesion of the Group.

Respect

- Respect employees as individuals, respect their rights and establish professional relationships across the Group based on listening, dialogue, trust and team spirit.
- Ban any harassing or discriminatory behaviour, prevent and address every instance of physical or moral violence, intolerance or injustice in the workplace.
- Respect the opinions of everyone, including political, trade-union or religious beliefs, provided that their expression does not violate laws and regulations; refrain from imposing them on others.
- Protect the environment by controlling risks, and be vigilant about the impacts of our activities on people and nature.

Solidarity

- Act collectively for the Group best interests and promote social cohesion within it.
- Support the most vulnerable people - amongst our colleagues or others people with disabilities or our customers in fuel poverty.
- Promote access to knowledge and its transfer - especially between different generations of Group employees.
- Be a committed actor in emergency situations, supporting people affected in France, Europe and the rest of the world.

Responsibility

- Guarantee the safety of our operations and our industrial facilities, ensuring the health and safety of people involved in our activities.
- Listen to employees, customers, suppliers, partners, shareholders, associations and public authorities and act with honesty, impartiality, fairness and transparency toward them.
- Apply a zero tolerance attitude towards fraud and corruption in all its forms.
- Protect tangible and intangible assets, handle sensitive information responsibly and comply with personal data protection regulations.
